

MONDAY - JULY 8 - 6:00 PM - EVENTS CENTER

COME GET INFORMED!

WHAT IS VALLEY FEVER?
WHO IS AT RISK?

**DO YOU HAVE A COUGH? FEVER? TIRED? RASH?
HEADACHE?**

Valley Fever (coccidioidomycosis) is a disease caused by a fungus in the soil in the Southwest desert. People get sick when they breathe in the fungus. How do you know? Get yourself tested.

A forum with Speakers:

- IHS
- Imperial County Public Health
- Edie Harmon

Monday, July 8, 2013 6:00 pm
Events Center, Ft. Yuma

Join us for refreshments
We are wishing to inform the public about what is Valley
Fever? Who is at risk?
