

EARTHWORKS FOR FARM RESILIENCE

with Warren Brush
Brenton Kelly

December 6-10, 2017
San Luis Obispo, CA

The need for people with hands-on skills in landscape restoration and drought-proofing is growing daily around the world.

WWW.PERMACULTUREDESIGN.US/RESILIENCE

December 6th – 10th 2017

Join Warren Brush, Brenton Kelly, and the Tactical Regeneration Team for a course in Central California.

The need for people with hands-on skills in landscape restoration and drought-proofing is growing daily around the world.

You will learn to:

- Survey and create rainwater harvesting structures and storages
- Create and armor spillways
- Mitigate erosion including head-cuts
- Identifying and creating rainwater run-on opportunities
- and much more...

Whether you are working on your own landscape, farm or as a consultant, **this course will grow your skills** in the appropriate design and construction of structures that will reduce erosion, increase biological productivity, harvest & store water, and create resiliency in the ecologies that sustain us. <http://permaculturedesign.us/resilience>
