This gathering will be a collective work where we gather as a cOMmunity that would love to create the Kind of World we want to see. Regenerating the earth through regenerative agriculture, creating conscious ecosystems for food and health - both for our inner landscapes and outer landscapes. Our intention is to unite central coast locals, get grounded in mother earths blessings, set our intentions/ plant our seeds for the season, and share the land with you all.

This event is a donation based event to build community and to also raise funds to bring electricity to the farm to host additional permaculture programs & festivities in the future.
